Worksheet 6.1
Greenhouse gas emissions

Please [study this flow chart](www.pearsonbacc.com) for world greenhouse gas emissions.

a) Approximately what proportion of world greenhouse gas emissions come from energy?

b) Which part of the energy sector emits most greenhouse gases (by volume)?

c) What are the main greenhouse gases emitted? Draw a pie chart to show their relative volume in world emissions.

d) Apart from the energy sector, what are the main sources of greenhouse gases?

e) What are the main sources of (i) methane and (ii) nitrous oxides?
